

WHAT FOLDING CONTAINERS CAN ACCOMPLISH

As a manufacturer, producer or import/export organization - if you're serious about reducing CO2 emissions - stop talking about it, and start using CCBRM 40' HQ ocean foldable containers. Save and keep track of your own CO2 emissions calculation reduction footprint.

CCBRM can uniquely position your logo, image, brand on CCBRM containers for everyone to see. Millions of people will see the difference you are making-while positively impacting the

environment, reducing costs, waste, and thousands of tons of harmful output of CO2.

CCBRM can work with your whole organization to implement a sustainable CO2 reduction logistics platform, that will allow you to calculate your company's CO2 ton reductions per shipment, while helping promote your company.

Reach out to us and lets work out a strategy for you.

- Reduce **CO2 emissions** and support sustainable innovation
- Reduce the **number of trucks** on the road
- Reduce **congestion**
- Reduce **space**
- Reduce **waste**
- Reduce **cost**
- Commercial Maritime Shipping Lines
- Class 1 and Short line Railroad
- Project Cargo

HOW IT FOLDS

STEP 1

- Unlock the locks
- Lower the sidewalls

STEP 2

- Lift the roof until the end walls fall inwards

STEP 3

- Lower the roof to create a package

STEP 4

- Lock the locks
- Bundle 4 folded containers to create a package

-  SUSTAINABLE
-  LEAN
-  4 IN 1
-  PATENTED
