ARCHER

Supply Chain Visibility. Finally.

Bringing product-level clarity and automated control to your organization.

Powered by the Logward Platform

NotebookLM

You Shouldn’t Have to Chase Your Own Data.

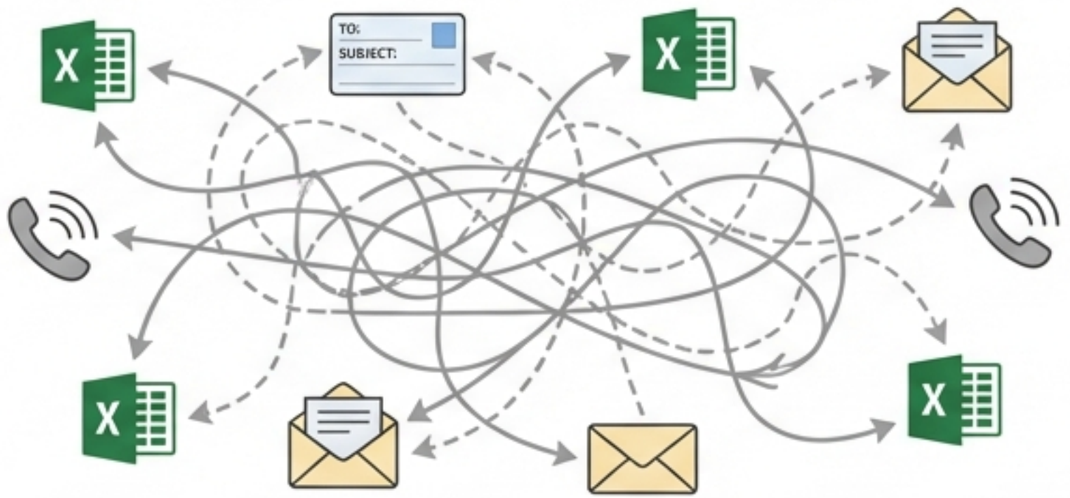
ARCHER
THINK DIFFERENT

The Reality Check

93% of shippers plan to increase technology investments, yet logistics teams are still trapped in email threads, Excel spreadsheets, and siloed legacy systems.

- **Visibility Gaps:** Tracking stops at the container, leaving the actual product—the POs and SKUs—a mystery.
- **Resource Drain:** Teams waste hours manually aggregating data just to answer “Where is it?”
- **Shadow IT:** When systems are rigid, employees build risky workarounds.

Current Fragmented Reality



The Goal: Unified Flow

NotebookLM

ARCHER
THINK DIFFERENT

The Platform That Adapts to Your Reality.

Archer delivers the Logward No-Code Supply Chain Execution Platform—designed to close system gaps without a massive IT overhaul.

ARCHER THINK DIFFERENT × LOGWARD

70% Faster Implementation

Compared to traditional IT projects. Get up and running in weeks, not years.

No-Code Flexibility

100% customizable without writing a single line of code. Adapt as you grow.

Legacy Independence

Works alongside your current ERP, TMS, and WMS—no 'rip and replace' required.

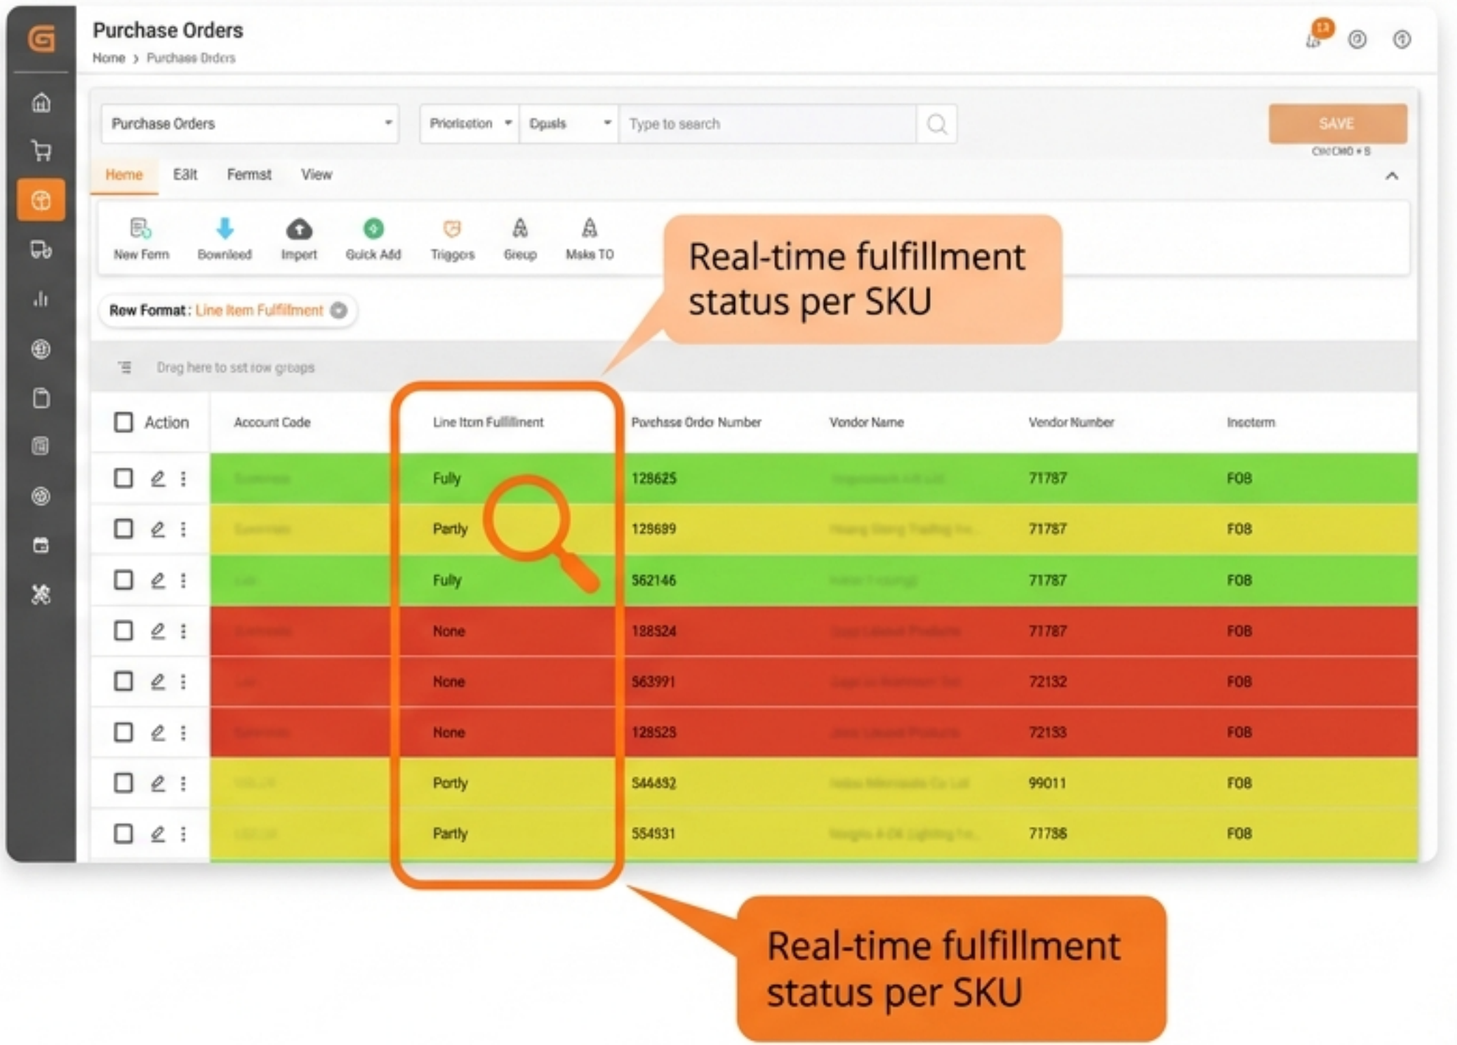
"When your systems do the heavy lifting, you're free to focus on what matters."

NotebookLM

Visibility Down to the PO Line Item

Most platforms track containers. We track business value. Know exactly which products are impacted by delays, down to the SKU number.

- **Granular Tracking:** Automated status updates at the PO level.
- **Status Clarity:** Instantly see 'Fully', 'Partly', or 'None' fulfilled statuses.
- **Smart Search:** Stop searching by container ID. Search by PO Number, Vendor, or Account.



NotebookLM

Stop Being the Gatekeeper. Democratize Your Data.

Give Sales, Procurement, and Finance the access they NEED without bottling up your Operations team. Stop chasing answers; let stakeholders serve themselves.

ARCHER
THINK DIFFERENT

1 Carrier Share Analysis

2 OTIF (On-Time In-Full) Performance

3 Self-Service Filtering

Key Benefit: Secure, shared views for internal teams and external partners ensuring everyone decides based on live data.

NotebookLM

Don’t Watch the Screen.
Let the Platform Watch for You.

ARCHER

Move to Management by Exception. Configure the system to filter the noise and only alert you when action is required.

Condition Met

e.g., "Delivery missed" or "Docs missing"

System Trigger

Automated workflow initiates instantly.

Action Alert

Email sent to Vendor or User Alert triggered.

Capabilities: Configurable triggers, automated email notifications, and user subscriptions to specific routes or exceptions.

NotebookLM

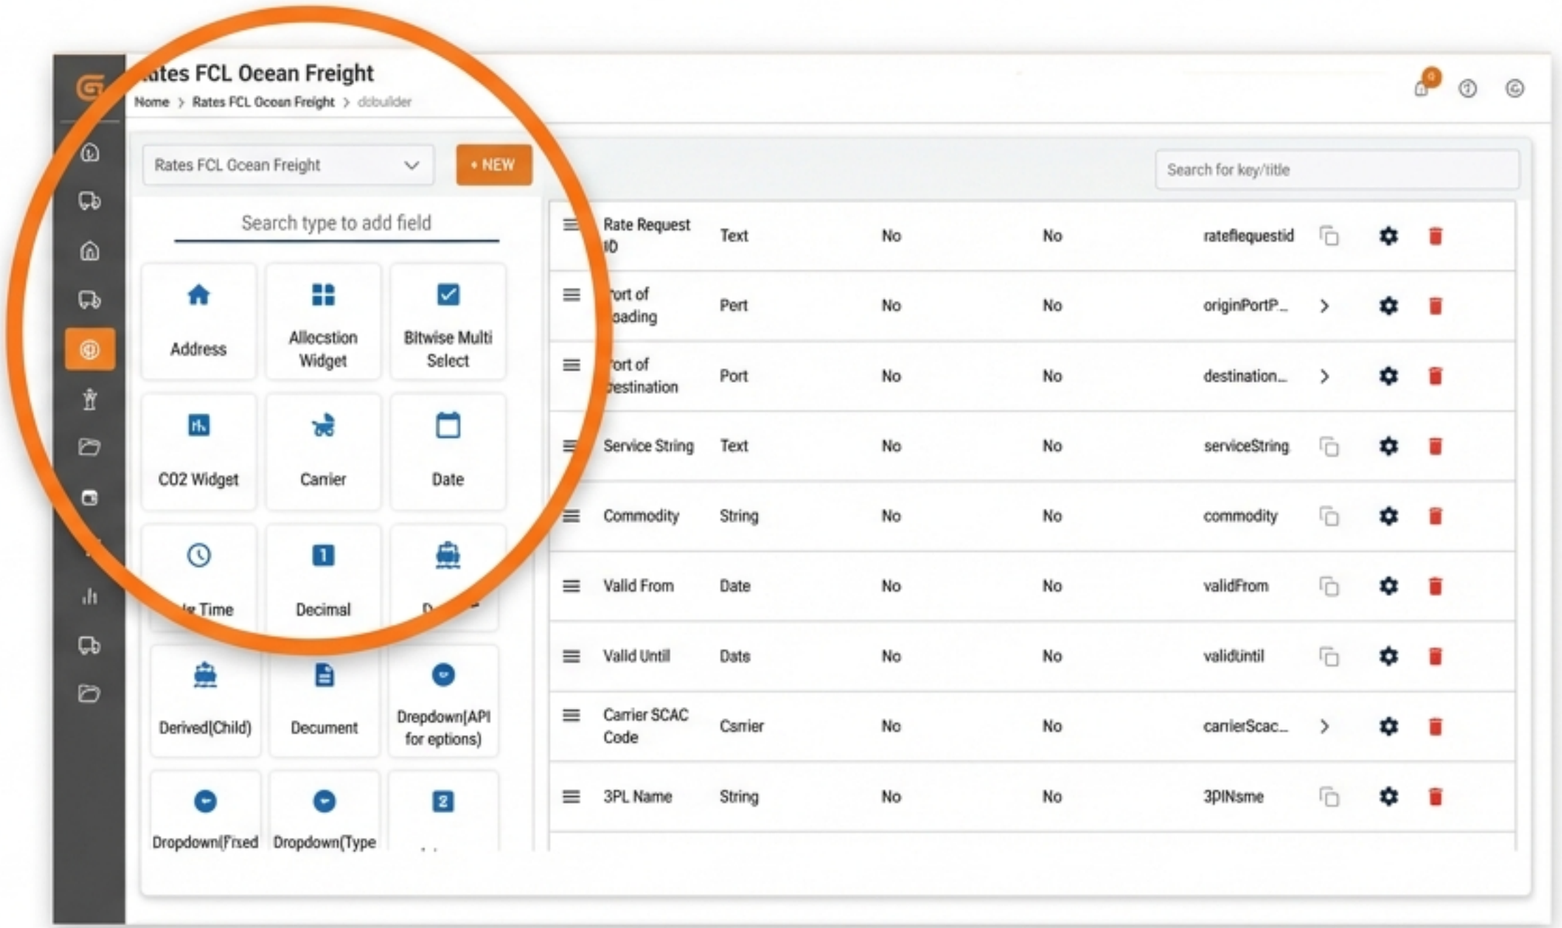
100% Customizable. Zero Coding Required.

ARCHER

Your supply chain changes fast. Your software should too. Modify workflows, add data fields, and adjust logic instantly.

The No-Code Advantage:

- **Table Editor:** Manage data structures as easily as a spreadsheet.
- **Drag & Drop:** Design custom workflows tailored to your needs.
- **Agility:** Respond to market disruptions in minutes, not months.



Intuitive drag-and-drop interface for instant field configuration.

ARCHER
THINK DIFFERENT

Unify Your Ecosystem.

We don’t replace your ecosystem; we connect it.
Seamless integration ensures data flows automatically.

Connectivity Standards: Native support for APIs (REST, SOAP), EDI, Webhooks, and CSV/Excel Bulk Import.

NotebookLM

Why Archer? Global Tech, Local Expertise.

ARCHER

Archer is the dedicated US integration partner for the Logward platform. We build the bridge between your business needs and world-class technology.

The Partnership Value:

- **1. Implementation:** We handle the setup, tailored to US market requirements.
- **2. Strategic Design:** We help you design data structures that mirror your actual operations.
- **3. Dedicated Support:** Local experts to troubleshoot and optimize your workflows.

Stop Chasing. Start Orchestrating.

Visibility
(Product level clarity)

Access
(Democratized data)

Control
(Automated alerts)

Schedule a demo to see your data at the product level.
